

Safety Day, Fun Day, Festival, Fair, Display Request Coalition Resource List

Please contact each organization direct with your request. We do not guarantee availability or participation in your event. Each organization may have request criteria and policy guidelines to follow.

Safe Kids Charlotte Mecklenburg appreciates your interest in the Safe Kids Coalition and your request for our participation in your upcoming event. The Coalition is just that - a coalition of agencies who are interested in childhood injury prevention. Our primary focus is preventing injuries for children 14 and under by educating the public, advocating for child safety and conducting programs in our target areas. We have established guidelines for conducting our programs where they will be the most beneficial and educational. Programs such as a child safety seat clinic or a bicycle safety rodeo make the best impact as stand-alone events. **As a coalition, we are not accepting requests for mobile child safety seat inspections OR bike rodeo events at this time.** For a "kids day," "fun day" or other type of festival or display, **we recommend you reach out to our member agencies for their support of your event.** We would be glad to provide educational materials for our members to display and distribute at your events or you may download the many safety tips and activities available from our website. Make sure to visit our websites, www.safekidscharmeck.org or www.safekids.org, to find tips on how to incorporate safety into your event or program.
